

M359 Hospital data summary

The following tables show the data used in the hospital relational model (in *Block 2*) and the SQL schema (in *Block 3*). The data tables can be used for both the relational and the SQL representations, as both blocks use the same core data throughout the study text and exercises. This summary is intended to be used as reference material to support your work with the course material, exercises and TMAs.

When studying *Block 2*, this database card should be used in conjunction with the material from *M359 Relational headings summary* card. You will also find a complete relational declaration in the *Hospital relational representation* document, which is supplied with the course material and located in the directory `..\M359\SupportMaterials\Hospital`.

When studying *Block 3*, this database card should be used in conjunction with the supplied SQL scripts.

Doctor

StaffNo	DoctorName	Position
110	Liversage	Consultant
131	Kalsi	Consultant
156	Hollis	Registrar
174	Gibson	Registrar
