

M359 University data summary

The following shows the data for the university relational model (in *Block 2*) and the SQL schema (in *Block 3*). The data tables can be used for both the relational and the SQL representations, as both blocks use the same core data throughout the study text and exercises. This summary is intended to be used as reference material to support your work with the course material, exercises and TMAs.

When studying *Block 2*, this database card should be used in conjunction with the material from *M359 Relational headings summary* card. You will also find a complete relational declaration in the *University relational representation* document, which is supplied with the course material and located in the directory `..\M359\SupportMaterials\University`.

When studying *Block 3*, this database card should be used in conjunction with the SQL scripts.
